Everything is possible with ESI[tronic].

Vehicle maintenance, diagnosis and repair is now easier, faster and more efficient than ever before with this globally proven software.

ESI[tronic] provides you with the latest, most comprehensive support and guidance for troubleshooting and repair as with previous versions. Now, in ESI[tronic] 2.0 Online you'll find maintenance and circuit diagrams, all important diagnostic functions, repair and troubleshooting instructions, manuals, vehicle data and experience-based repair cases (EBR) for more than 150 vehicle brands.

- ▶ Vehicle identification via KBA key or VIN
- ▶ ECU diagnostics for cars, vans, trucks and two-wheeler systems in only 20 seconds, on average
- ▶ All relevant data for repair and maintenance according to manufacturer specifications
- ▶ Required actions presented logically with easy-to-follow instructions
- ▶ The very latest vehicle and maintenance information always available, thanks to online updates
- ▶ Part of Bosch Connected Repair, our workshop connectivity solution

The new features in detail.

Intelligent search functionality

- ▶ Entering an error code will take you directly to the relevant information in the troubleshooting instructions or supporting documents
- ▶ Automated word suggestions make it faster and easier to input symptom descriptions and error codes
- ▶ Comprehensive and fast full-text search, making all relevant documents available in an instant

Here's Alex checking out the new search function. Use the QR code to watch the video.

Experienced-based repair (EBR)

- ▶ Database with more than 750,000 use cases and vehicle combinations
- ▶ Repair instructions are created by Bosch authors and validated by a global network of workshop professionals
- ▶ The clear and simple structure gives you a quick overview of relevant information

Here's Eduardo checking out the experience-based repair. Use the QR code to watch the video.

Switch between online and offline mode

- ▶ Online: many new advantages due to connection to the online world.
- ▶ Offline: convenient and familiar working, as always. Or on the road, without internet access.
- ▶ Download: automatic updates after a one-time installation of the Diagnostics Download Manager (DDM). Updates are loaded in the background while you continue to work – you decide when to schedule the installation.

Here's Simon checking out the online and offline modes. Use the QR code to watch the video.

Simple and efficient in every way.

With the ESI[tronic] 2.0 Online you're always up to date: All of the features that deliver up-to-date data, such as intelligent troubleshooting are online, so you always have the latest version without having to install updates.

The customer arrives at the workshop with an unknown vehicle symptom.

Troubleshooting with the mobile and modular KTS ECU diagnostics.

Gathering of information from a full-text search, using error codes and the automated suggestions feature if required.

Workshop validations of real-life use cases and repair instructions.

Repair support with installation positions, circuit diagrams, target values, removal and installation instructions.

Thanks to these new functions, vehicles are through the workshop more quickly and back on the road faster than ever before.

”Vehicle identification with VIN is easy, and I can view all errors immediately.”

”The new search feature is really helpful when the symptoms don't match the error readout.”

”Thanks to the new search and the EBR I can quickly find the correct and most up-to-date solution.”

”The context menu provides information on all components so now I can find the information I need more quickly.”

Your benefits within easy reach.

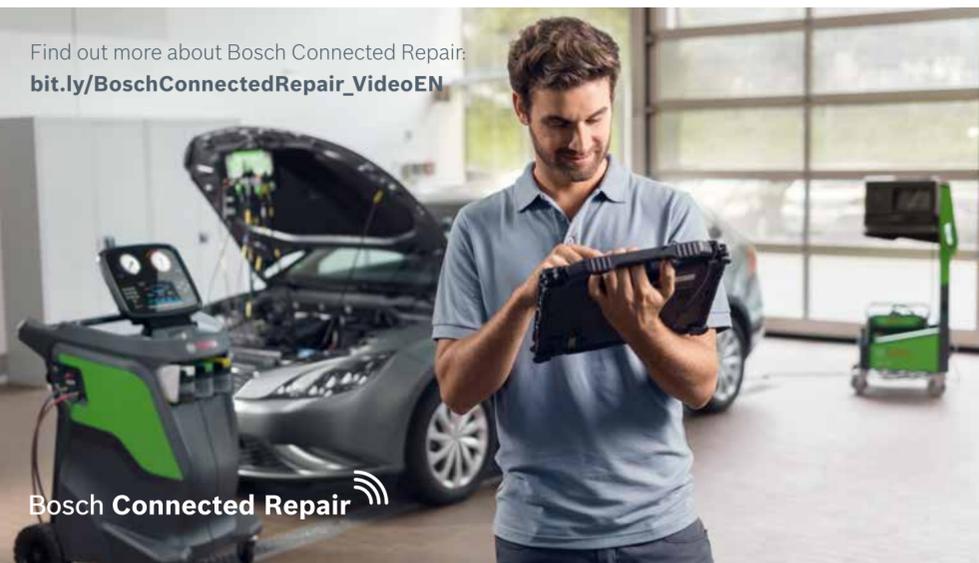

With its modular design, the ESI[tronic] 2.0 Online ensures a faster vehicle diagnostic process, while also guaranteeing the best, tried and tested repair solution, every time. The individual core modules at a glance are:

- Vehicle diagnostics (SD)
- Vehicle troubleshooting and repair instructions (SIS)
- Experience-based repair – known fixes (EBR)
- Vehicle mechanics, maintenance schedules and information (M)
- Circuit diagrams of the comfort systems (P)
- Technical Hotline and vehicle repair hotline

Bosch Connected Repair

ESI[tronic] 2.0 Online is part of Bosch Connected Repair, our workshop networking solution, which links software systems, workshop equipment and vehicle data in order to optimise workshop efficiency and workflows. This can save you up to 10 minutes per vehicle in the repair process.
